ANDREAE CONCERTINA FILTERS

The v-shaped front wall prevents over spray bounce back and particle migration.

The deeper v-shape back wall captures over spray and deposits it outside of the airflow.

The filter exhaust holes are positioned to maintain constant airflow during the loading phase.

Static pressure increases slowly with the accumulation of over spray resulting in uniform airflow

Availble Sizes:
900mm x 9m ***$105inc PER BOX***
1000mm x 10m ***$127inc PER BOX***

660G - CEILING FILTRATION

The Clean Air Flow 660G series of ceiling filters are backed with imported PE or common non-flammable net scrim. The 660G series of ceiling filters are mainly used in advanced industries such as car painting.

The outlet side of the filter media is reinforced by imported PE and fire-retardant net. High flame resistance, high dust holding capacity, low initial resistance, safe and reliable.

The Clean Air Flow Filters are Composited from imported high-performance, break-resistant synthetic fiber in gradual technology; Due to complete penetration of viscosity in media, dust particles can not pass. Fully filtered air evenly spreads to form a laminar flow state to achieve the best spray results.

Availble Sizes:
1000mm x 20m ***$495inc PER ROLL***
1260mm x 16m ***$495inc PER ROLL***
1500mm x 16m ***$605inc PER ROLL***
1600mm x 14m ***$572inc PER ROLL***
1750mm x 20m ***$935inc PER ROLL***
2000mm x 20m ***$935inc PER ROLL***

We can also arrange ceiling filters to be cut to the required size and qty
Please call to obtain a quote on your required sizes

2K WHITE

Product Features
- Very Good gloss & colour retention
- Good flow and application properties
- Hard and abrasion resistant
- Very good chemical resistance
- Fast dust free drying time

Product Benefits
- Long lasting film integrity & durability
- High quality high gloss finish
- Extended service life
- Use for manufacturing & material handling
- Fast turnaround time & high productivity

2K high gloss white
suitable for spray booths
5L KIT $165inc

FLOOR GRID REMOVER

The Grate Lifter Trolley is the perfect solution for safely and efficiently removing and relocating floor grates in spray booths, preparation bays, and maintenance areas.

Designed for ergonomic use and built for durability, this trolley provides a safer alternative to manual lifting, reducing strain and the risk of injury.

3M DIRT TRAP MATERIAL

Designed to protect surfaces while trapping dust, dirt and paint overspray 3M™ Dirt Trap Material captures airborne contaminants resulting in a cleaner repair. When overspray and dust settles on your freshly painted surfaces, they must be removed, creating extra work and raising costs.

3M™ Dirt Trap Protection Material is a white non-woven surface protection material with adhesive backing specially engineered and designed to protect surfaces while helping to trap dust and overspray and brightens work areas.

This product helps to capture airborne contaminants resulting in a cleaner repair. The material can also be used to help protect other areas in the shop such as: table tops, paint scales, paint mixing room walls and floors, prep bays areas, etc.

- White non-woven surface protection material with adhesive backing
- Protects surfaces while trapping dust, dirt and paint overspray
- Brightens work areas
- Protects other work areas such as: table tops, paint scales, paint mixing rooms walls and floors
- Help capture airborne contaminants resulting in a cleaner repair

REMARKABLE NOISE REDUCTION & LOW VIBRATION LEVELS

Designed with ergonomics in mind, the new Mark V random orbital polisher ensures a comfortable polishing experience, even during extended use. Its well-balanced construction reduces strain & fatigue, enabling you to work with efficiency and focus

NEW GEAR TECHNOLOGY

Powered by the most advanced polymer solutions. The new advanced gears are meticulously designed to reduce noise levels during polishing operations. With a focus on redusing vibrations,the new gears delvier exceptional stability & precision, enabling you to maintain complete control over your polishing movements.

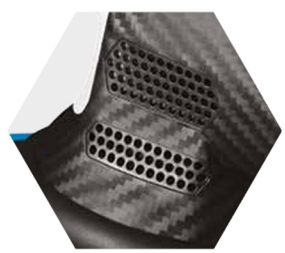

NEW ANTISPINNING RING

Experience unparalleled precision, durability, mobility, & cutting capacity with this innovative feature. Benefit from reduced friction & heat, enabling effortless operation & extended usage. Seamlessly tacle any surface with the enhanced rotation, unlocking limitless possibilites for flawless results.

NEW ONE-BLOCK COVER

The one-bloak construction of the cover head ensures maximum stability, eliminating any potential movement or flexing that can compromise your polishing results. The new cover is engineered to significantly reduce vibrations, providing a comfortable & stable grip, allowing you to focus on achieving flawlessly polished surfaces.

NEW VENTILATION SYSTEM

New advanced airflow engineering to optimize ventilation, effectively reducing heat buildup during prolonged polishing sessions. The new ventilation system maximizes cooling effiency, keeping the Mark V polisher at an ideal operating temperature. It minimizes stress on internal components, ensuring longevity & reducing the risk of malfunctions.

BLIND RIVET GUN

- Input Voltage: 220V
- Battery Voltage: 18V
- Pressure: 60KN
- Stroke: 30mm
- Cycle Time: 3 – 6s
- Charging Time: 2 Hours
- Operation Method: Electric Hydraulic
- Main Machine Weight: 3kg

$4,389inc

#FY-KRS-505L

The variable-speed piston provides precise control to suit rivets of various diameters and sheet metal strengths, with continuously adjustable joining force for self-piercing riveting, plugging, piercing, and seaming applications. Designed for versatility, it is also ideal for sheet shaping, flattening, and semi-tubular riveting, making it suitable for repairs on vehicles including Land Rover, Jaguar, and Mercedes models. Its ergonomic anti-slip handle allows comfortable one-handed operation, while the safety valve can be set for either automatic or manual reset at selected pressure levels. The 360° rotating U-arm delivers improved access and accuracy for efficient operation in tight spaces. Powered by a high-performance lithium battery, it offers strong, reliable performance with fast recharge capability, and a range of optional die and head sets are also available through your distributor.

BUMPER THING

- Bumper Thing is fully adjustable, and holds the bumper firmly.
- Open design allows access to backside for repairing & painting.
- Handle on the wings allows painter to rotate parts & stand upright while spraying.
- Adjustable friction on rotating joint, painter can easily adjust tension to position parts of different weights.
- Gas spring counter balance for safe & easy rotation of parts.
- Ideal position for blending return curves.
- Vertical adjustment for a comfortable working height.
- Wide castors & brakes for stable easy positioning in booth.

$875inc

/EQUIP

WING THING

- The heavy duty Wing Thing needs only one employee to safely roll parts in and out of the booth.
- Holds parts at a working height during all phases of the work.
- Adjustable tension at pivot holds parts in any position.
- Position parts in the best light for painting.
- Allows the painter to control the direction of the overspray.
- Bolt down parts such as mirrors and wire down guards, spoilers, mouldings, and grills.
- The 4 wheel casters allow for easy positioning.

SOLVENT GUNWASH MACHINES

UNIRAM UM80S

-Compact wall mount unit designed for quick color changes with an optional stand for free standing installation
-Uses solvent under high pressure to clean the paint channel in less than 30 seconds at the press of a button
-Flow-through brush removes paint from the outside of the gun
-Air Blow Gun dries the spray gun and a spray out verifies a clean paint channel
-Also includes Cap Brush and whip line
-Ideal for cleaning PPS and other disposable cups
-Non-corrosive stainless steel cleaning tank

$2,650inc

UNIRAM UG4000

-Automatic & Manual Solvent Gun Wash Unit
-Cleans guns in under 60 seconds
-Automatic wash, air flush and clear-rinse cycle
-Manual clean rinse using Flow-through Brush activated by "hands free" foot pedal
-Built in vent for automatic fume extraction
-Guns & Pots Cleaned: 2
-No. of Swirl Action Jets: 14
-Wash Timer
-Stainless Steel Tank
-Dual Diaphragm Pump
-Tank Size: 17.25 x 13.5 x 14.25" (WDH)

$4,950inc

WATERBORNE GUNWASH MACHINES

UNIRAM UM80W

-Compact wall mount unit designed for quick colour changes with an optional stand for free standing installation
-Uses water under high pressure to clean the paint channel in less than 30 seconds at the press of a button
-Flow-through brush removes paint from the outside of the gun
-Air blow gun dries the spray gun and a spray out verifies a clean paint channel
-Also includes cap brush and whip line
-Ideal for cleaning PPS and other disposable cups
-Non-corrosive stainless steel cleaning tank

$2,650inc

UNIRAM UM120W

-Wash gun delivers high pressure water to clean the paint channel
-Flow-through brush removes paint from the outside of the gun
-Air gun fries the spray gun & a spray out verifies a clean paint channel
-The “GREEN” water recovery system features filtering after treatment with Uniram’s flocculating agent, COAGKLEEN FP.
-Recovering clean water may be disposed of or reused, minimizing water consumption

$3,025inc

SOLVENT RECYCLER

UNIRAM URS600

UNIRAM solvent recyclers effectively reclaim used solvent by segregating the waste residue in a bag in the distillation tank.

The clean, distilled solvent can be used over and over with virtually no loss of cleaning power. Typical solvents are paint thinner, gun wash solvent, acetone and MEK. Unique hardened aluminium tank construction provides excellent heat transfer.

With a UNIRAM recycler unnecessary solvent purchases are eliminated; purchases drop by up to 90%. Waste disposal costs drop by up to 95% Profitability improves.

Powered by heavy-duty diaphragm pump, timer automatically transfers 20L of dirty solvent into the recycler tank and a timer transfers clean solvent from the recycler.

Includes 20L pail and transfer hoses.

- Tank Capacity: 20 litres
- Speed: 20 litres in about 4 hours

$12,650inc

UNIRAM URS2000CE

UNIRAM solvent recyclers effectively reclaim used solvent by segregating the waste residue in a bag in the distillation tank.

The clean, distilled solvent can be used over and over with virtually no loss of cleaning power. Typical solvents are paint thinner, gun wash solvent, acetone and MEK. Unique hardened aluminium tank construction provides excellent heat transfer.

With a UNIRAM recycler unnecessary solvent purchases are eliminated; purchases drop by up to 90%. Waste disposal costs drop by up to 95% Profitability improves.

- Tank Capacity: 80 litres
- Speed: 75 litres in about 8-10 hours

LITHAN MINI 1
UV-A CURING LAMP

Designed by paint technicians for paint technicians, Lihtan's "Mini1" is a cost effective entry level UV curing system with the latest in high-intensity UV-A LED's provide more curing power and are safer than traditional Mercury lamps.

Lihtan's ground breaking modular design allows you to upgrade from the standard Mini1 unit to a Mini1+1 to increase the size of your curing area or to cure 2 different jobs at once.

Requiring no warm up time the unit powers up to maximum curing intensity, instantly.

Manufactured for all current supply voltages and frequencies, it features low power consumption.

Direct current power ensures you get the highest curing intensity every time.

Handheld/Free Standing Unit
Average Irradiance: 14 mW/cm²
Peak Irradiance: 17 mW/cm²
LED UVA nm: 395nm UVA
LED expected lifespan (hr): Plus 30,000 hours
Power supply: Direct power supply from main control board
Curing area (mm): 350mm x 350mm
Power cable (mtr): extendable 6 Mtr cable

CALL TO ARRANGE A DEMO

LITHAN R2
UV-A CURING LAMP

Designed by paint technicians for paint technicians, Lihtan's R2 one stop curing system with the latest in high-intensity UV-A LED's provide more curing power and are safer than traditional Mercury lamps.

Lihtan's ground breaking modular design allows you to upgrade from the standard R2 unit to an R3, R4, or R6 unit to increase the size of your curing area.

Requiring no warm up time the unit powers up to maximum curing intensity, instantly.

Manufactured for all current supply voltages and frequencies, it features low power consumption.

Built in distance sensor removes the hassle of manually measuring the position of your work and ensures you get the highest curing intensity every time.

Comes with built in UV block out shade and work table.

LIHTAN R-2
Power Voltage (V): 110VAC or 220VAC Single phase 1.5amps
Electrical Power (W): 100W (50W per Cassette)
Total LED power (W): 70W (35W per cassette)
Curing Area (mm) 500mm x 650mm
Emiting Zone: 500mm x 400mm
Average Irradiance: 14 mW/cm²
Peak Irradiance: 17 mW/cm²
LED UVA nm: 395nm UVA
LED expected lifespan (hr): Plus 30,000 hours
Control: Advanced multifunctional digital control system

Handheld/Free Standing Unit
Power supply: Direct power supply from main control board
